| Dangshan Xian | 砀山县     | 砀山縣     | 安徽砀山县治    | 1911   | 1911   |

## How to record time values

- > **intervals**
- > **timestamps**
- > **begin – end dates**

## How to visualize GIS objects with time values

- > **z-axis**
- > **animations**
- > **maps + timelines**

# Intervals - sensor data

CONUS + Puerto Rico: 2/27/2013 1-Day Observed Precipitation  
Valid at 2/27/2013 1200 UTC - Created 3/1/13 15:29 UTC

Source: AHPS <http://water.weather.gov/precip/>

# Intervals - sensor data

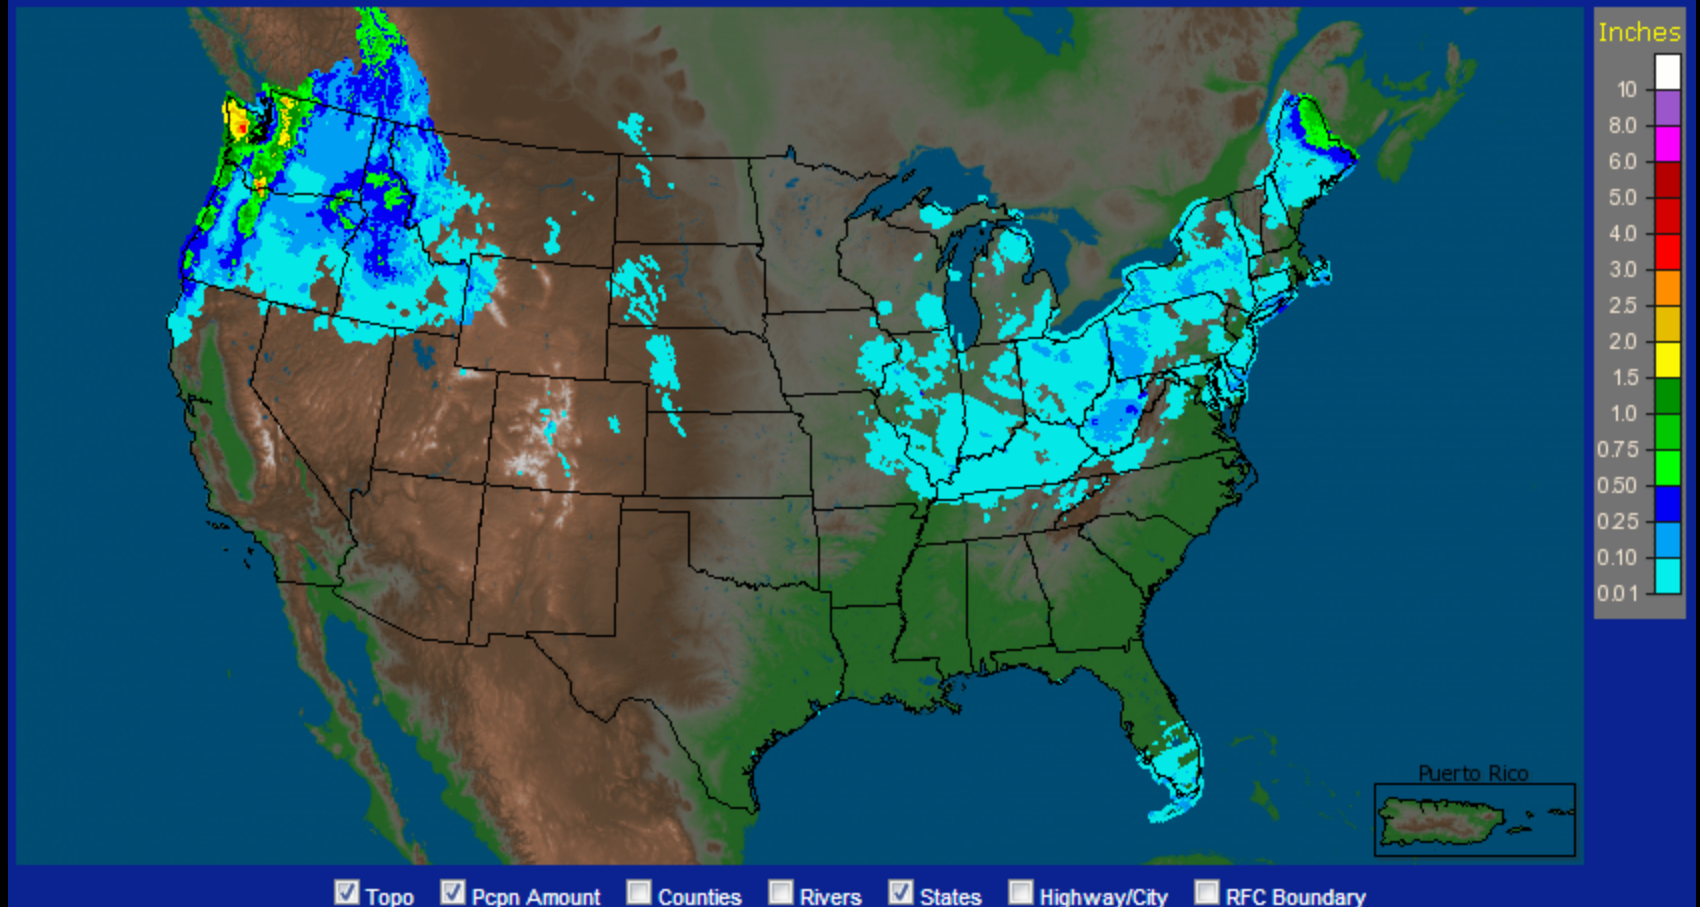

CONUS + Puerto Rico: 2/28/2013 1-Day Observed Precipitation  
Valid at 2/28/2013 1200 UTC - Created 3/1/13 15:32 UTC

Source: AHPS <http://water.weather.gov/precip/>

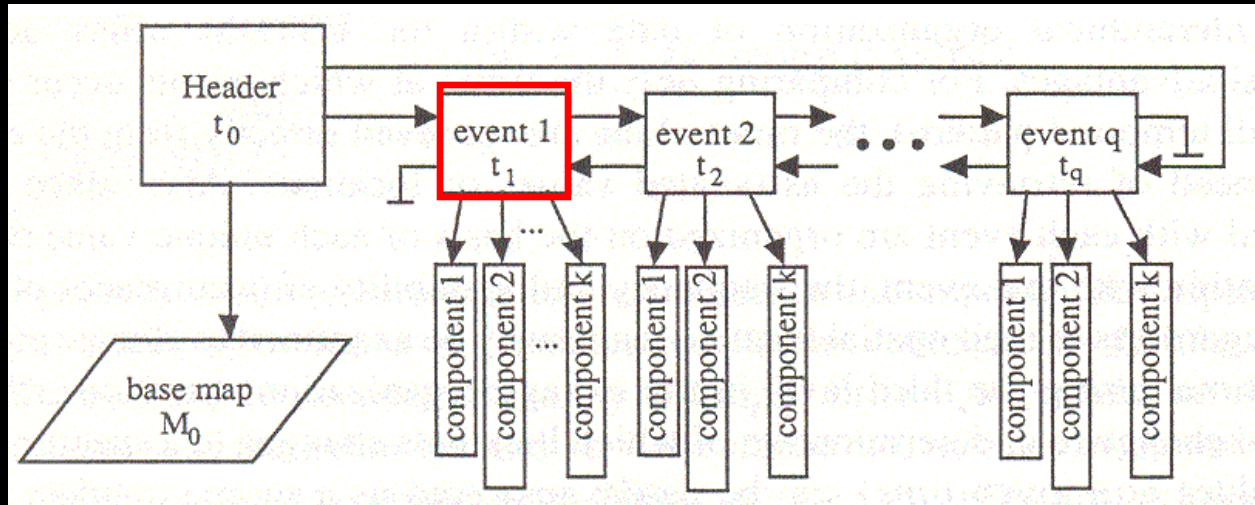

# Intervals - sensor data

CONUS + Puerto Rico: Current 1-Day Observed Precipitation  
Valid at 3/1/2013 1200 UTC - Created 3/1/13 15:35 UTC

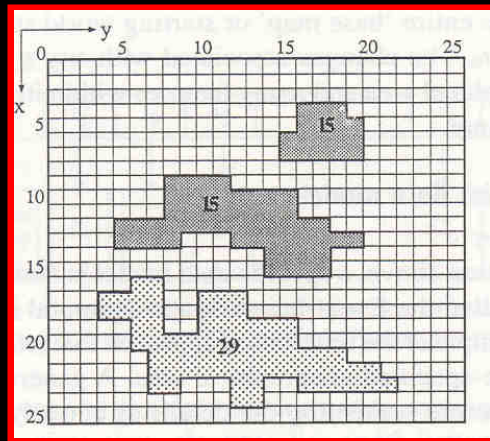

Source: AHPS <http://water.weather.gov/precip/>

# Intervals - event based spatio-temporal model

## event 1

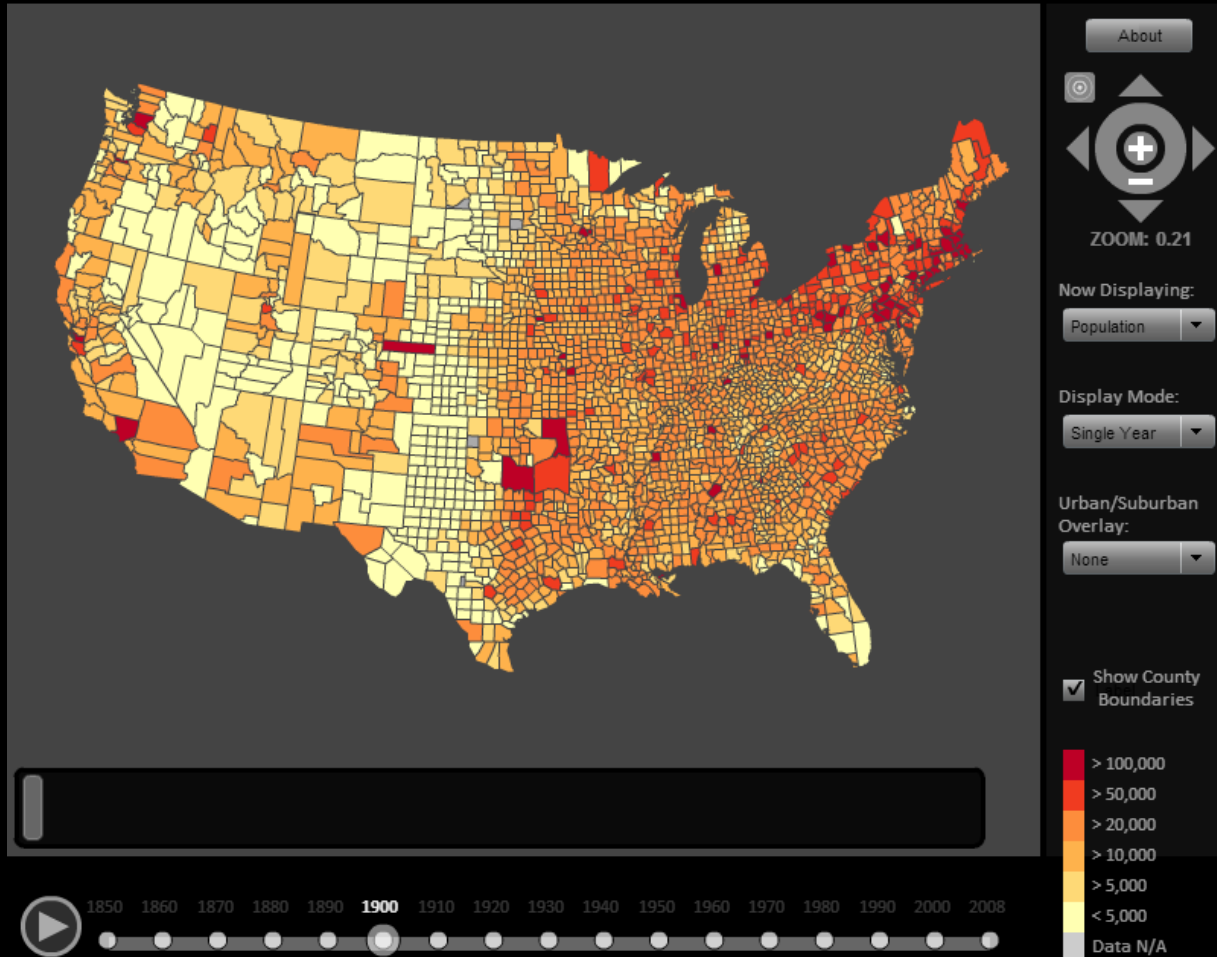

See: Peuquet and Duan (1995)

# Time slices - cross time classification

**Time Slice = separate dataset for each specific interval**

**time slice at time 16**

**time slice at time 11**

**time slice at time 6**

**time slice at time 2**

# beware of the MAUP

See “NHGIS” McMaster, et al (2005)  
<http://www.cartesia.org/geodoc/icc2005/pdf/oral/TEMA14/Session%203/ROBERT%20MCMASTER.pdf>

# Typology of MAUP

**(a) Name change:** changes the number of a geographical unit without a boundary change

**(b) Transfer:** moves part of one geographical unit to another unit

**(c) Merger:** combines two or more geographical units into one unit

**(d) Division:** splits one geographical unit into two or more units

See “NHGIS” McMaster, et al (2005)

<http://www.cartesia.org/geodoc/icc2005/pdf/oral/TEMA14/Session%203/ROBERT%20MCMASTER.pdf>

## Begin and end dates at irregular intervals

| object | begin | end | precBy |
|--------|-------|-----|--------|
| A      | t1    | t2  |        |
| B      | t2    | t3  | A      |
| C      | t3    | t4  | B      |
| D      | t4    | t5  | C      |

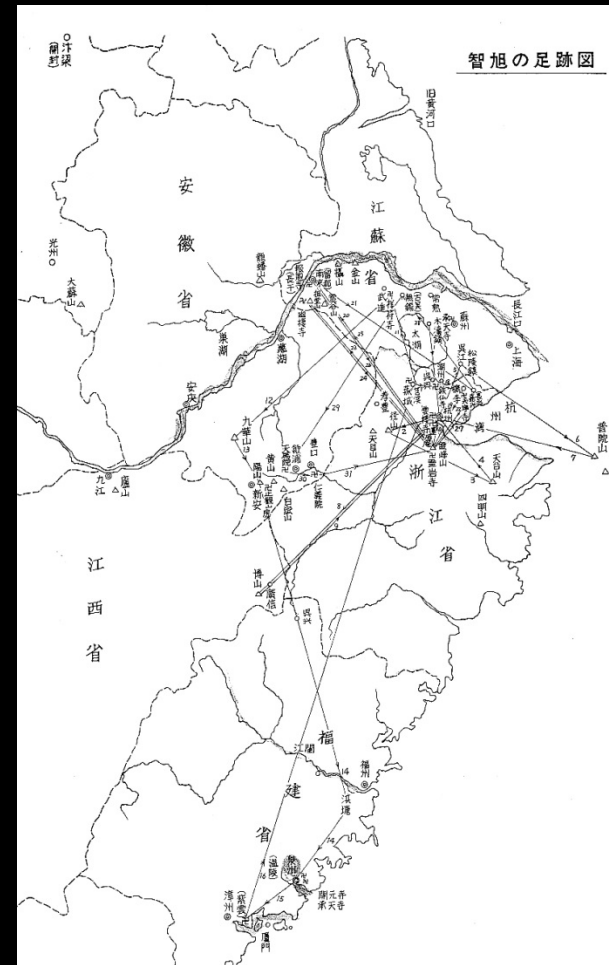

## Begin and end dates – using the z axis for time

| object | begin | end | precBy |
|--------|-------|-----|--------|
| A      | t1    | t2  |        |
| B      | t2    | t3  | A      |
| C      | t3    | t4  | B      |
| D      | t4    | t5  | C      |

spatio-temporal objects

## Sequence of points to show movement over time

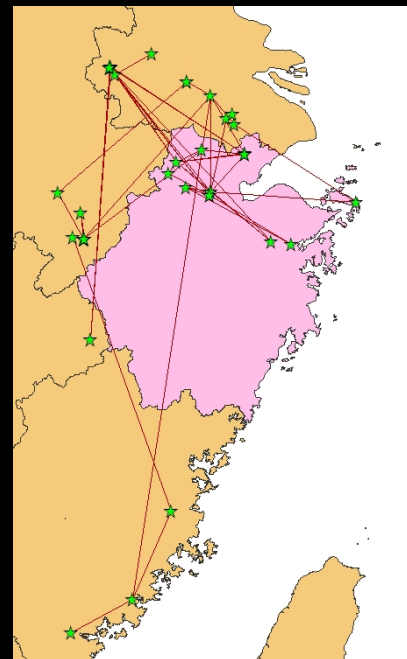

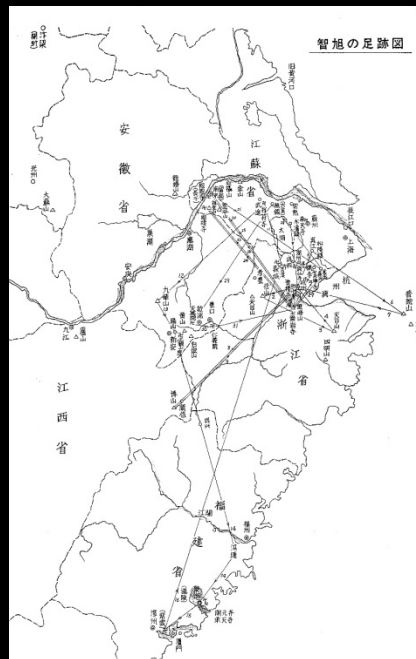

Based on research by Beverly Faulks

[http://www.fas.harvard.edu/~chgis/work/docs/papers/Berman\\_ModelingNetworks\\_Bochum07.pdf](http://www.fas.harvard.edu/~chgis/work/docs/papers/Berman_ModelingNetworks_Bochum07.pdf)

# Time sequence does not have to be equal intervals

| place_id | year | season    | sequence | source              | type_id | type_description      | chrono_events_notes      |
|----------|------|-----------|----------|---------------------|---------|-----------------------|--------------------------|
| ouyi_1   | 1599 |           | 1        | autobio             | 1       | birth                 |                          |
| ouyi_3   | 1622 | summer    | 2        | ZL.8.2.1-8, autobio | 10      | Yogacara (唯識論)        |                          |
| ouyi_3   | 1622 | summer    | 3        | ZL.8.2.1-8, autobio | 9       | received teachings    |                          |
| ouyi_2   | 1622 | late fall | 4        | autobio             | 4       | engaged in meditation |                          |
| ouyi_6   | 1622 |           | 5        | ZL.8.2.1            | 25      | other                 | first met Xinyi Dazhen 新 |
| ouyi_6   | 1623 |           | 6        | 選佛譜序                | 18      | divination game       | 傳燈[選佛圖]隨喜                |
| ouyi_4   | 1623 | spring    | 7        |                     | 25      | other                 | 謁幽溪傳燈 - pay respe        |
| ouyi_4   | 1623 | fall      | 8        |                     | 4       | engaged in meditation |                          |

## Begin-end dates for areal units as ST objects

## Historical Source Notes

Source Note: 苏州府 (1375-1723年) 界线

明洪武八年 (1375), 扬州府崇明县来属, 府境扩大。清顺治二年 (1645) 地入清, 属江南省。康熙六年 (1667) 为江苏省会。清雍正二年 (1724), 太仓州升为直隶州, 境域缩小。

明洪武八年 (1375年), 扬州府崇明县来属, (1) 府境扩大。洪武十一年正月 (1378年2月) 隶京师。(2) 永乐元年正月 (1421年2月) 属南京。洪熙元年三月戊戌 (1425年4月16日) 复属京师。(3) 正统六年十一月甲午 (1441年11月14日) 复属南京 (南直隶)。(4) 弘治十年正月己巳 (1497年2月11日) 增领太仓州, 崇明县改隶太仓州。(5) 至明末, 苏州府领吴、长洲、昆山、常熟、吴江、嘉定6县、太仓州 (领崇明县)。清顺治二年闰六月乙巳 (1645年8月19日) 地入清, 属江南省。(6) 康熙六年七月甲寅 (1667年8月30日) 以原江南省右布政使司为江苏布政使司, (7) 府属江苏省, 江苏巡抚及布政、按察两使治此, 为江苏省会。(8) 雍正二年九月甲辰 (1724年10月20日), 增领元和、震泽、昭文、新阳、镇洋、新阳6县。(9) 治所为吴、长洲、元和3县。(10) 清雍正二年 (1724), 太仓州升为直隶州, 镇洋、嘉定、宝山、崇明4县往属太仓直隶州, 境域缩小(11)。

## Tables

| Sys-ID    | Hist-Place | From | To   |
|-----------|------------|------|------|
| 90244     | Suzhou Fu  | 1367 | 1374 |
| 90245     | Suzhou Fu  | 1375 | 1723 |
| 90246     | Suzhou Fu  | 1724 | 1911 |
| 333320501 | Shzhou Shi | 1990 | 1990 |

| Sys-ID | Place-Name | Prec-ID | Prec-Name      |
|--------|------------|---------|----------------|
| 90245  | Suzhou Fu  | 90244   | Suzhou Fu      |
| 90245  | Suzhou Fu  | 40385   | Chongming Zhou |

| Sys-ID | Name      | Part-Of           | From | To   |
|--------|-----------|-------------------|------|------|
| 90245  | Suzhou Fu | Jiangnan Province | 1645 | 1667 |
| 90245  | Suzhou Fu | Jiangsu Province  | 1667 | 1911 |

## Spatial Objects (Regions)

## return of the MAUP

See “Methods for Space Time Analysis” Henderson and Berman (2003)  
<http://proceedings.esri.com/library/userconf/proc03/p0833.pdf>

# Modeling areal units as they change over time

# Logic of spatio-temporal objects as areal units

## I - Evolution of a single entity

### a) Basic changes

### b) Transformations

### c) Movements

## II - Functional relationships between entities

### a) Replacement processes

### b) Diffusion processes

## III - Evolution of spatial structures involving several entities (restructuring processes)
